Dispensary	CCS of Alabama LLC	I am in favor of the Alabama Medical Cannabis Commission granting a license to CCS of Alabama LLC. I know two of the owners, Vincent Schilleci, Jr. and Vincent Schilleci, III, to be men of the highest character. Both men have been active in their community for many years and are respected by all who know them.
		I have the upmost respect for owners of CCS of Alabama, LLC and know they will be great operators. They are very accomplished and respected in their fields of business. Their combined experience in very regulated industries makes them the perfect fit.
		This guys are very upstanding and reputable folks. They'd do business the right way.
		Have known the Schilleci family as a client and friends and would be good business operators
Dispensary	CS Alabama Investments

Integrated Facility	3 Notch Roots LLC	Where are they located
		Curaleaf is a great company to work for. Their operations are solid and their products are good quality.
		Curaleaf is a company that prioritizes patient wellbeing, offers top-notch products and actively engages in community initiatives. Those are always important topics for me when shopping. I have shopped at different cannabis companies/locations, and this has always been my top choice. The staff is always attentive and well educated.

		<p>I have worked for 3 different multi-state cannabis companies, and this is the healthiest organization – by far. From the way it treats team members to the care given to patients at every level of experience and knowledge, Curaleaf is driving the industry forward and helping people every single day. As a team member, I especially appreciate the deep experience of my colleagues across departments and functions. Every day I learn something new and feel proud to be a part of this team. I hope this dedication and focus can soon serve patients in Alabama by expanding safe access to cannabis products they can trust.</p>
		<p>I have worked in the cannabis industry for 15 years starting in California, and then working my way to the Florida market. I've worked with numerous companies throughout my time in cannabis. My time with Curaleaf has been some of the best because of the education and commitment to the patient. Curaleaf is a leader in the industry for this reason, and I feel that Alabama patients would prosper from having a relationship with Curaleaf. Cannabis is the leading reason for the reduction in opioid use throughout the country for that reason alone Alabama should work with companies like Curaleaf.</p>
		<p>Curaleaf runs an incredibly solid business and cares about its employees. It is a great company to work for and always has its employee best interests in mind. The retail setting is extremely patient friendly, and the company has a great customer service team to answer any and all patient questions.</p>
		<p>Wanted to make sure I spoke about 3 Notch Roots, LLC and Curaleaf as a whole. They are an incredible company to work for and their products of very high quality. Curaleaf operates a good business across the globe and has been able to impact an extraordinary amount of people with their products and service.</p>
		<p>This organization truly cares about their people and their patients. They ensure that all of their products are high quality so that the patients of Alabama get the medicine they need. The level of experience and knowledge will definitely play a pivotal role in this state. I am proud to be a part of this organization and be able to help people everyday!</p>

		<p>I know that they really care about training and building a culture that puts guests and patients first. This is the most important aspect for me as a medical cannabis card holder. They do not treat everyone the same. They engage in conversation to determine each guests experience and expectations, for every visit. When I am not feeling well and need to be quick, they make it happen. When I feel good and want to talk, they make time. It reminds me of my family physician when I was young. I was from a small town and everyone in the office would be so happy to see me. It makes you forget about your troubles for a while. End of day, they all need to make money, 3 Notch Roots does that by making life long relationships.</p>
		<p>3 Notch roots is a fantastic company. They respect their employees and partners in the community and are reliable, trustworthy, business partners. They are a fantastic company to work for.</p>
		<p>Curaleaf consistently demonstrates excellence in business operations, boasting a well-run and solidly managed enterprise. The quality of their products is consistently high, reflecting a commitment to delivering top-notch offerings. Additionally, Curaleaf is renowned as a great company to work for, fostering a positive and rewarding work environment. I am excited to see this potential expansion into a great market like Alabama and believe that Curaleaf offers a great opportunity for employment and will be an active member in the community. Thanks Steve</p>
		<p>Curaleaf would be an amazing addition to the market! Their cannabis is cultivated responsibly and with the consumer's best interest in mind. They use the safest methods in cultivation and processing making for a great quality product! They have been an incredible company to work for and dedicated to created a wonderful culture. Although their operations are very solid, the team is always looking for better ways to streamline processes and stay on top of the most recent technologies. They are always championing some of the best compliance standards as well.</p>
		<p>Curaleaf is always a pleasure to shop with. Their dispensaries are clean and well organized and their store associates are always so kind and knowledgeable.</p>

		<p>I am writing to express my strong support for the approval of a dispensary license for Curaleaf in our community. Having had the opportunity to shop at Curaleaf dispensaries in multiple states, I am consistently impressed with the exceptional level of service, customer care, and patient experience they provide across the country. Curaleaf has set a remarkable standard for the cannabis industry when it comes to serving patients and customers. Here are some reasons why I believe their license should be approved: Consistency: Regardless of the state or location, Curaleaf maintains a consistent level of excellence in its services. This reliability is a testament to their commitment to providing the highest quality products and customer care. Patient-Centered Approach: Curaleaf's dedication to the well-being of patients is evident in their product offerings and knowledgeable staff. They go the extra mile to ensure that patients receive the right guidance and support for their individual needs. Community Involvement: Curaleaf has a strong track record of community involvement and social responsibility. They actively engage with local communities and contribute positively to the areas where they operate. Innovation: Curaleaf is known for its innovative products and solutions, which have made a positive impact on the lives of countless patients. Their commitment to research and development is commendable. Safety and Compliance: Curaleaf prioritizes safety and compliance with all relevant regulations. Their rigorous quality control measures ensure that patients receive safe and effective products. In conclusion, I believe that granting Curaleaf a dispensary license in our community would be a significant benefit. Their dedication to service excellence, patient care, and their track record of positive contributions to communities make them an ideal candidate for this opportunity. I kindly request that you consider my endorsement and support for Curaleaf's dispensary license application. If you require any further information or have any questions, please do not hesitate to reach out to me. Thank you for your time and consideration.</p>

Integrated Facility	Bragg Canna of Alabama, LLC	<p>First of all, I want to thank you for letting the public contribute to the support of an applicant. It is unique that a regulating body would ask the public for their opinion or endorsement so thank you for this opportunity. Bragg Canna is a wonderful family owned and operated company that I believe will make you very proud if awarded a cannabis license. I have worked closely with this group, and I believe that not only do they have the knowledge and competency, but they are a patient focused team and they care deeply about the success of the program. I believe that Dennis and Bragg Canna know the significance of supplying quality medicine to Alabama patients and they know how important safety is to the integrity of the program. They have operated successfully within the Hemp program and under department of agriculture supervision for a very long time, and I hope that you will consider their application and apply favor if possible because they will make you proud and I believe that they are up to the task. Thank you for your time.</p>

Integrated Facility	Southeast Cannabis Company, LLC	<p>Dear Alabama Medical Cannabis Commission, I am writing in support of Southeast Cannabis Company's receipt of an Integrated Facilities License. As a pharmacist in the State of Alabama, I am encouraged that Alabama has taken the first step by legalizing medical cannabis for the patients of Alabama that desperately need an alternative to currently available medications. As a pharmacist, I am fully aware that there is a tremendous need for this medication. Knowing the founding members of Southeast Cannabis Company, I believe that this diversely experienced, all Alabama, minority team has what it takes to get this program started with quality and efficiency.</p>

Dear Commissioners, My son was diagnosed with Autism Spectrum Disorder when he was thirteen months old. He has received intensive ABA therapy since then and at times has required 25 to 40 hours of therapy per week. We have seen a tremendous improvement in all aspects of his daily life from day to day conversation skills to achieving age appropriate behavior. We are witnessing these improvements daily in school and in any and all social engagements. He does, as all autistic children do, suffer with anxiety and some type of sensory processing disorder. In his therapy sessions they teach him coping mechanisms to achieve in their words "a calm body and a quiet mouth". As a previous Florida resident medical cannabis was an available treatment option for my son versus pharmaceuticals. Now that we currently reside in Alabama that is no longer an available option. Like so many others we are waiting for this to become available as it has helped so many with a multitude of ailments and disorders. It is critical that he and other patients like him have access to this potentially life altering therapeutic. For that reason it is important to me that Alabama build an industry that works. We need an industry that is patient centered and has the infrastructure to run effectively, efficiently and is in compliance with all regulations. I believe Southeast Cannabis Company embodies all of these needed qualities and prerequisites. With their years of combined medical, horticultural and manufacturing experience they are by far the most qualified team to not only get their company off the ground but to have a successful and lasting impact on the community.

I am a businessman currently living in Alabama. My wife and I recently moved from Colorado. Being from Colorado and familiar with the ups and downs of the business, I understand the importance of having a highly qualified team with experience. Chuck Smith has years of manufacturing experience and industry relationships. George Radcliff has medical experience and a passion for patient advocacy. Pair that with Oliver Washington's horticulture experience and you have the makings of an unmatched team. I know that they will put their best foot forward to get this program up and running for the patients of Alabama.

		<p>I am a Board Certified Ophthalmologist in Alabama. I specialize in the treatment of glaucoma patients. Even though the America Glaucoma Society (AGS), nor the American Academy of Ophthalmology (AAO) recommend the use of marijuana as a treatment for glaucoma, it is a medical fact that cannabis does lower intra ocular pressure. Many patients who are treated for glaucoma with FDA approved topical drops also use cannabis. As Alabama lifts the ban on cannabis use, the treatment of glaucoma will likely be included as a use case for medical cannabis. I have known the principals of Southeast Cannabis Company for many years, and I believe that their diverse experience makes them uniquely equipped to bring exceptional pharmaceutical grade products to the Alabama market. Thankyou, Curtis M. Graf, MD</p>
		<p>Dear Commissioners: I have spent 35-years as a commercial lender with 2 major-regional banks in Mobile, Alabama. After that, I established, licensed, grew, and operated a company ultimately spanning 5 states for the past 10-years, selling it 10 weeks ago before retiring. Seldom have I been able to speak to a business plan more appropriately conservative, or financial projections marked by such prudence on both sides of the accounting ledger as I have with those of Southeast Cannabis Company. Add to that the lofty integrity of the owners, the depth of their team both in experience and culturally (to say nothing of their natural affinity for and orientation toward the patient vis-à-vis their respective careers), and I cannot imagine a more dependable team to carry forward this medication needed by so many in our great state. Thank you.</p>
Integrated Facility	Southeastern Medical Wellness, LLC	
Integrated Facility	Southern Crop Holding Company, LLC	

Integrated Facility	Specialty Medical Products of Alabama, LLC	<p>of Specialty Medical Prodcuts of Alabama as an advocate for my patients. I am an interventional radiologist that specializes in interventional and conventional pain management at the Alabama Orthopedic Clinic in Mobile. I live and practice in Alabama, and I was trained in this state. This is my home and it is my patients' home, and I would be doing a disservice to my patients and to my community at large if I did not advocate in the very strongest terms for this company. I have personally toured their facility in Baldwin County, met their leadership, and their scientists. These men understand the very real use of the many cannabinoids and terpenes in this plant for therapeutic effect. Their facility is of the highest caliber, their processes well-designed, and their vision for pharmaceutical purity and efficacy is beyond reproach. I cannot more highly recommend any entity for a license in this state. These are the products that I want to use for my patients, and a complete survey of this company will very clearly demonstrate their commitment to safe and effective products for the people of Alabama. I am a professor at the University of South Alabama in the department of radiology in addition to my other duties, and as an educator of doctors in training I can also speak to the commitment from this company to education regarding the use of these compounds for the various ailments that can be positively affected by them. My students need to know about products that are safe and effective, and Specialty Medical Prodcuts of Alabama have committed to assisting with education regarding these compounds. I know of no other such commitment from their competitors. I offer humbly to discuss these matters with anyone interested in whatever setting is desired. My patients and my community, ravaged as they have been by the hideousness of the opiate epidemic, deserve the very best chance at lasting help, and I feel strongly that Specialty Medical Prodcuts of Alabama must be one of the companies permitted by our great state to do so. I am very sincerely yours, Marshall K. Walker, Sr., MD, MPH Interventional Pain Management Alabama Orthopedic Clinic, P.C.</p>
---------------------	--	--

		<p>Having worked extensively in the cannabis industry since 2018 both on the commercialization and regulatory aspects I can unequivocally say Specialty Medical Products of Alabama, LLC is one of a select handful of vertically integrated facilities in the entire country that possesses the capabilities and standards for the cannabis industry. It is my recommendation that if the commission has not sent a qualified individual who experience in cannabis policy and cannabis processing/manufacturing facilities they need to do so promptly because what Specialty Medical Products of Alabama, LLC has built is a state-of-the-art facility that has the ability to work along side academia to conduct major cannabis research projects which could not only drive new jobs to the state but also put Alabama on the map for leading the way in cannabinoid research. I've had the pleasure of touring the facility a year ago when they were conducting cannabinoid extraction for CBD and other non-psychoactive cannabinoids for commercial usage under the state CBD authority. After touring other facilities around the state of Alabama it was quite evident that Specialty Medical Products of Alabama, LLC was building a comprehensive, world class cannabinoid excellence facility to delivery top quality medicine to those in need while aiding the research community. Their location to the South Alabama's School of Medicine makes its a prime location to bring in research grants and other agency sponsored funds to drive innovation and growth to the state of Alabama.</p>
Integrated Facility	Sustainable Alabama, LLC	<p>I know several of the principals of Sustainable AL and they are well respected members of the community as well as successful and driven real estate developers. I also have gotten to know another member of their team who is also a well respected and experienced professional in the field. Sustainable would be a safe and wise choice.</p>
		<p>I would like to express my support for Sustainable Alabama seeking their third award for a fully integrated license. Not only are all members citizens of Alabama but all are well respected in their local communities and professions. I personally know several of the principals and had the opportunity to assist the group in the real estate site selection process. Throughout the whole process they have done everything the commission asked in submitting of the applications honestly and by the book. There should be no question as to whether or not they should receive a license for the third and hopefully final time.</p>

		I am putting in a note in regards to Sustainable Alabama, LLC obtaining an integrated facility license. I personally know the owners of the entity, have conducted business with them in the past, and can vouch on their moral compass and business acumen. I believe individuals such as those behind Sustainable Alabama, LLC should be at the forefront of running and managing the medical cannabis industry in the State of Alabama.

Integrated Facility	Wagon Trail Med-Serv, LLC	I have over 30 years of Chemical Processing Experience both in Food Grade and Material Processing. I have visited Wagon Trail Med-Serv's processing Plant and was thoroughly impressed with both the process effectiveness and Joey Robertson's knowledge. I recommend Wagon Trail Med-Serv for several reasons. One is the processing plant is in Alabama. Two, his products can make it to the people in Alabama who need it the worst. Three, I have friends with cancer and other diseases where his products could help them maintain a better quality of life. I am respectfully requesting you give Joey Robertson the licensing he and Wagon Trail Med Serv are seeking. Thank you for your time and consideration.

Processor	Green Acres Organic Pharms Inc.	<p>Hello, my name is Colton Farris, and I am a commercial insurance agent out of Mississippi. I specialize in cannabis insurance and currently have cannabis clients from California to Maine and sprinkled everywhere in between. I have worked closely with the Mississippi Medical Marijuana Association, the Alabama Cannabis Association, and the Alabama Hemp Farmers Association as well as their members for the past three years. I was asked to speak at a Hemp conference in Tuscaloosa, AL back in 2021 and that is where I first met Green Acres Organic Pharms. Since 2021 Green Acres has been an excellent client of mine that has been both professional and successful in all of their endeavors. I have personally connected them with other clients of mine over the years so that they can consult with successful cannabis operators to learn what challenges the future can hold for a brand-new cannabis operation and what products best serve patients. Green Acres is currently the only operating processor (hemp) in your state, and they are ready to start processing cannabis for Alabama patients! They are knowledgeable, teachable, and prepared to be the best cannabis processor in the State of Alabama if given the opportunity!</p>
		<p>I am have had an excellent relationship with this company and its owners. Not only are they personally invested in our community in general, they contribute as a successful small business and are a local source of CBD products and information regarding the uses and contraindications of use. Prior to Green Acres, patients reported were purchasing these products from out-of-state suppliers. Sometimes, from reputable companies and many times not from companies at all. I enjoy the luxury of having a reputable and trustworthy company in Florence and would like to continue having them here as a local authority, local retailer and because they positively impact the community.</p>

		<p>As a functional medicine pharmacist and herbalist, Green Acres CBD products have been absolutely invaluable to my patients. The quality, purity, and availability of the products has allowed hundreds and hundreds of patients to reduce costly prescriptions medications, avoid narcotics and other meds with debilitating side effects, and live an overall better quality of life. I use these products myself and within my own family and they have helped us deal with anxiety, depression, grief and loss, insomnia, joint pain, and so much more. Carmelo and the team at Green Acres keep us going with the utmost professionalism and the best customer service and products. From a holistic perspective, I recommend their products to almost everyone I meet, simply because they are clean, pure, and do what they are supposed to do, and I am beyond thankful to have them on my team! Respectfully, I ask that you grant Green Acres Organic Farms a license to continue making a positive difference in the health and wellness of Alabamians.</p>
		<p>Green Acres Organic Farms, Inc. is my source of full spectrum CBD tincture, a product that has both eliminated my need for other chronic pain medications and has improved my sleep quality tremendously, all with no perceived adverse side effects. I've been a customer for over a year now and have found their company to be solid, their personnel to be very professional, and their product to be a godsend. I do hope they are allowed to thrive under Alabama's evolving hemp regulations. Respectfully submitted, Shelley Heard / Huntsville, AL</p>
		<p>The products we have purchased from Green Acres, have proven to be helpful with my anxiety and my insomnia, while not causing any side effects. We have purchased products from Green Acres Organic Farms for the past two years and have been completely satisfied with the products and service they provide. I strongly support them in their efforts to renew their licenses.</p>

		<p>CBD oil and related products have emerged as a source of profound relief for numerous individuals battling various illnesses and diseases. The transformative effects have been nothing short of remarkable. Im so happy to know we have this alternative to help these individuals. In our community, CBD oil and products have sparked a wave of positivity, bringing relief and renewed hope to individuals battling various health challenges. These personal stories underscore the potential for a brighter, healthier future. It's inspiring to witness how this natural remedy is making a difference in the lives of so many. Let's continue to share these stories and support one another on our journey toward well-being. I could not be more proud of what Green Acres Organic Pharms has accomplished. I'm so glad we have them.</p>
		<p>I highly recommend this company to be awarded a processor license. This company desires to obey all the rules and regulations for pure products that will benefit our health and to do it safely. They go the extra mile in working with the customer in many ways. They are a small company that wants to meet the needs of the people and create local opportunities for others to help bolster the economy in the great state of Alabama.</p>
		<p>The folks at Green Acres not only offer quality products, they are good people! I've been ordering CBD oil from them ever since my Orthopedist recommended it for arthritis in my right shoulder. I've also used their Delta 8 & 9 products to ease the symptoms of ADHD and autism, and got some for my mother when she was undergoing chemo. It would be wonderful to have more options to choose from, so I can see what works best for me. This would also give them a chance to provide their community with jobs and economic opportunities. This industry has done wonders for communities throughout the US; it seems like a no-brainer to me!</p>
		<p>I started purchasing products from this business during the COVID lockdown in the Spring of 2020. Supporting small local businesses from my hometown is something that's always been important to me. Supporting a business like Green Acres Organic Pharms is easy because the product is top notch and the pricing is very reasonable. The owner is extremely knowledgeable about the product and is committed to helping people vs just making a profit. We need more of that in this world and especially in my dear home, Alabama.</p>
		<p>Very knowledgeable.</p>

		<p>My wife suffers from systemic sclerosis, and arthritis and their products are the only relief she receives. We appreciate that they are a locally owned and operated company. They have always been super helpful, reliable and trustworthy which is a rarity in this world. I believe they should be granted a license to continue providing this service to the community. Small business is vital to our country, please help keep the American dream alive. Sincerely, Stanley</p>
		<p>I'm in my mid-sixties and I've been using Delta 8 Gummies from Green Acres Organic Pharms, Inc. for nearly a year now. I use these instead of taking NSAIDs for my joint pain which is severe enough to cause me to have restless nights, and not getting enough sleep. I take 1 – 25mg gummy each night at bedtime and have been able to sleep through the night with little to no joint pain since I have been taking them. Having Type 2 Diabetes, I am supposed to stay away from NSAIDs as they will damage my kidneys. These products without a doubt have increased my quality of life and I have had no adverse side effects from these products.</p>
		<p>I have been a customer for over 2 years, I first started taking CBD oil for pain after a tibia/fibula fracture. It helped with my pain as I was healing, I take it to this day because I can tell a noticeable difference with my pain, it is without side effects, I also sometimes put it in my dog's food. My dog is older and has some hip/joint mobility issues, I can tell it is helping. I also use the delta 8 gummies for anxiety relief and relaxation. I would like to see the products expand. Their products have done wonders for me which is why I am a returning customer, it is medicene.</p>

		<p>I'm writing in support of Green Acres Organic Pharms having their license reinstated. I first met him at our local farmer's market. I listened to him explain his products to other customers. He's very knowledgeable about the products he sells. After listening to him I stepped up and asked if it was safe for pets. He was very helpful and answered all my questions about how to help my little dog. He's 19 years old and blind. Occasionally he gets hurt and it's very difficult for him to recover. He'd been stung by a bee and could barely move for 4 days and was throwing up a lot with bloody diarrhea. There's nothing our vets can do for him really because of his age. I bought some cannabis tincture and gave it to him when I got home. It took him about 20 minutes to calm down and completely relax. It was the first time in 4 days he was not in pain and shaking. He was able to rest through the night and walk on his own the next day. By early afternoon he no longer had bloody diarrhea and was back to his normal self. I also gave it to another dog who has severe anxiety during storms. She relaxed and slept through the thunder. I would really like to be able to continue helping my pets and family with these products. Thank you for reading my comments.</p>
		<p>I approve for Alabama to advance into the medical CBD field would benefit many Alabamians here in Alabama. Green Acres Organic Pharms, Inc. would make a good contributor to the CBD industry, Their products are high quality, and very informative on their products and manufacturing processes highly recommended.</p>
		<p>I think it's very important for Green Acres Organic Pharms, LLC to be granted a license in Lauderdale County. This business is much needed in this area.</p>
		<p>Green Acres Pharms have been providing my company with the best quality products and I never have to worry about meeting compliance when selling their products. Green Acres goes above and beyond to make sure their products are of the highest quality and accurately meet testing standards. They are on top of all matters and respond to every question I may have quickly and efficiently. It is a pleasure working with them and I always know my customers will be happy with the product they are receiving.</p>

		<p>Hello. I'm writing in support of Green Acres Organic Pharms, currently applying for a medical marijuana processing license. Their goal is to build the facility in Florence, AL, to provide jobs and economic opportunities to the local community. I have used their CBD oil as well as their CBD and lavender salve, both of which are of great quality and have helped with muscle and joint pain. Furthermore, they have always provided excellent customer service and communication at every step of the way. Given this, I have every reason to believe they would be responsible stewards of the duty to process medical marijuana for Alabama.</p>
Processor	Green Phoenix Holdings LLC	
Processor	Guaranteed Investments AL LLC	
Processor	Jasper Development Group Inc.	<p>To whom it may concern. I strongly suggest Jasper Development Group to be considered for a license. They are prepared to serve the patients of Alabama!!!</p>
		<p>Please consider Jasper Development Group and Tyler Robinson for a license. They will serve patients in the state of Alabama very well. Thank You.</p>
		<p>Jasper Alabama is a great location for this, we need the jobs and all economic impact this could bring. I strongly Recommend Jasper Development. I believe this will help a lot of patients. Thank You</p>
		<p>Please consider issuing licenses to Jasper Development Group. This will bring more jobs to walker county and help economy in this area. This is a group of professionals that will serve the State and citizens with honor and respect. I will be glad to see this all move forward to help patients that would benefit from medical cannabis. Thank you for your consideration.</p>
